

Metro NXT trading guide

To facilitate trading before activation of the pegs making possible trading on Metro DEX, we use NXT platform. NXT charges transaction fees in Next coins (symbol NXT), one coin per transaction: asset transfer costs 1NXT and order placing/cancelation/fulfillment also costs 1NXT.

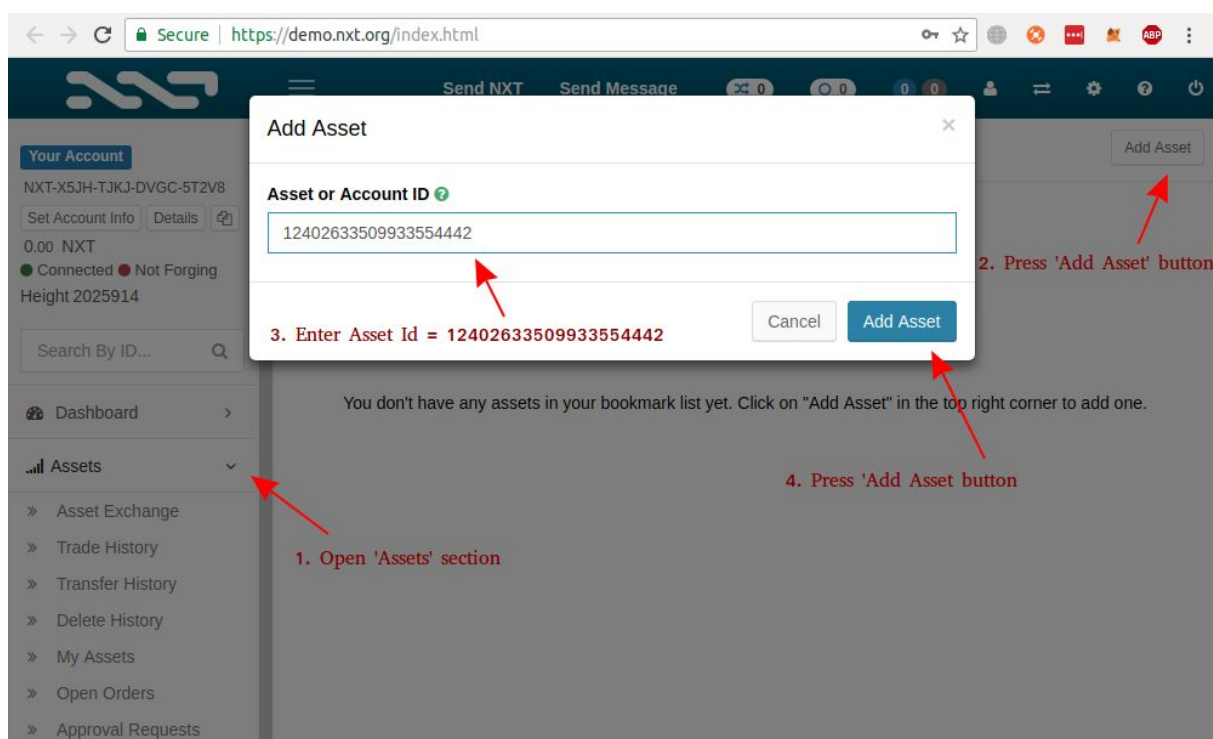

So if you are selling Metro for the 1st time and your NXT account with the same secret phrase doesn't have NXT coins yet, don't send all your Metro tokens to Transfer bot - use "buy nxt" command described in FAQ first to buy several NXT through the bot, and send the remaining Metro you wish to sell after purchasing NXT. Those NXT coins will enable you to make transactions in NXT network.

NXT wallet

You may use local NXT wallet (secure) or online (easier).

- 1) Local. Go to <https://nxtplatform.org/download/> and download wallet. Run and wait until it synced.
- 2) Online. Go to <https://demo.nxt.org/index.html> and use it online.
